Bind Add-In list

Typically, less than 5% of Bind members need to add coverage during the year for certain plannable procedures, like endoscopies and knee replacements. Bind calls this Add-In coverage.

Add-Ins require provider copays and additional premiums for a period of time. Add-In premiums and copays are available at choosebind.com/uhg (access code UHG2020).

If you need Add-In coverage, you need to purchase it at least three days before the procedure.
